A line drawing of a building facade. The drawing uses red and yellow outlines on a white background. The building has a complex structure with multiple levels and sections. On the left, there's a section with a gabled roof and two small square windows. To its right is a larger section with a flat roof and several rectangular windows of different sizes. Further right, there's a section with a series of vertical lines, possibly representing a colonnade or a series of pillars. The drawing is minimalist, focusing on the geometric forms and lines of the building's exterior.

This architectural drawing shows a side elevation of a building. Red lines highlight specific features: a horizontal line across the upper part of the facade, a vertical line on the left side, and a small square on the right side. The building has a complex roofline with multiple levels and a small gabled section on the right.
